

# PSA (PAYE Settlement Agreements)

*Never miss a calculation*

Replace days spent manually managing 'spreadsheets-from-hell' and start using smart automation for your PSA return.

ARKK's Platform enables the management of large volumes of data by automating repetitive tasks, based on your rules, to identify taxable and non-taxable data. Identify the exceptions that need your attention and submit your return with increased accuracy and confidence in a fraction of the time.

## Simplify PSA Reporting

A 3D graphic on a blue background. It features a target with a bullseye and a red arrow hitting the center. To the right of the target is a bar chart with several bars of varying heights, some topped with green stars. The entire graphic is composed of semi-transparent, layered shapes, giving it a modern, digital feel.

### **Save time and reduce admin burden**

Eliminate time spent manually categorising expenses. Instead, focus only on the exceptions that matter and free up extra days of capacity within your team.

**Maintain compliance** Full audit trails and in-platform notifications track every interaction and exception, so that you can view live progress on your PSA return and always return to prior years in the event of an HMRC audit.

**Codify knowledge** ARKK's secure, cloud-based platform allows you to store policies and documents related to your PSA return for fast reference and future review.

**Increase accuracy** Automating repetitive calculations will increase accuracy and demonstrate how the final figures were produced for any future inquiries.

**Cost effective** Don't overpay because of taking a higher-level approach where taxable expenditure can be overstated and not all reliefs and exemptions claimed.

**Cloud-native collaboration** ARKK's cloud-first approach is more important today than it has ever been. Our 'security by design' development principle means our ISO-27001 certified platform has been built from the ground up with security at its core.

# About ARKK

At ARKK, we simplify the complex world of financial and regulatory data for over 890 clients globally. Innovation brought us to where we are today, and while we are staying ahead, so are our customers - not only keeping up with trends but setting them. When you partner with ARKK, you can be sure our solutions will deliver efficiency, accuracy, and complete confidence.

Our customers are at the heart of everything we do. We build side-by-side with our clients, constantly validating our development against their needs and challenges to ensure our platform becomes a part of their internal landscape. Leading with a customer first approach means we're building what our customers actually need, not what we think our customers need. Our clients have been supported for 14 years across regulatory and tax reporting by our internationally award-winning support team.

ARKK support solutions and services for a range of financial and regulatory reporting including VAT automation, ESEF (European Single Electronic Format) and iXBRL tagging, and a suite of regulatory conversion solutions.
